

# exCELL 220

## new release!

### the future of stretch wrap technology...

Integrated Packaging (IP) has launched two new models of their top selling semi automatic ExCell stretch wrapping machines. Designed in Australia by engineers from Integrated Machinery at their Melbourne head office, the new ExCell series is the most exciting stretch wrapping equipment to hit the market.

We have listened to our customers and can now offer a host of upgraded features to make our ExCell machines the best value and most efficient stretch wrappers in Australia.

Apart from a host of features and extras available, the ExCell 220 has been upgraded to include a power stretch film unit, relocation of the carriage motor and gearbox to the base of the mast for ease of maintenance, new slimline electrical cabinet and a service reminder alarm. We also provide ongoing preventative maintenance and repair service to ensure optimal performance from our wrapping machines.
